# SCO 5.0.5 Driver Installation

This publication describes how to install the IntelliPort II software device drivers for SCO UNIX System V, Release 5.0.5. Before you begin, make sure that the operating system is installed and active on your system, and that you have the correct driver software for your operating system.

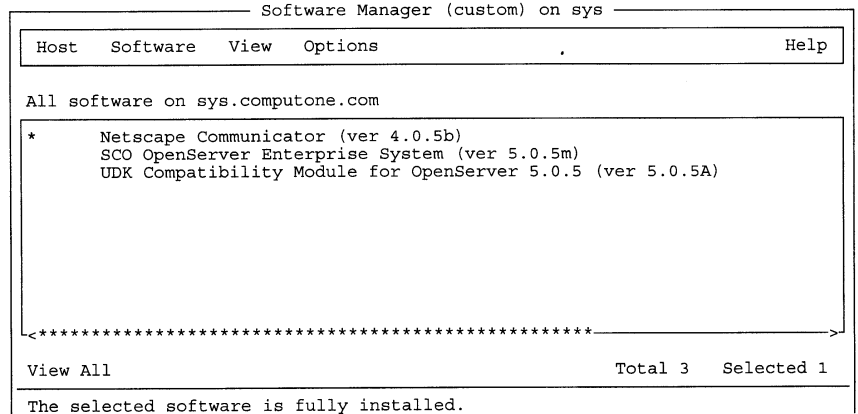

**NOTE:** The phrases IntelliPort II and IntelliPort Plus are used interchangeably in this document. IntelliPort Plus software is compatible with IntelliPort II cards.

---

## Installation Procedure

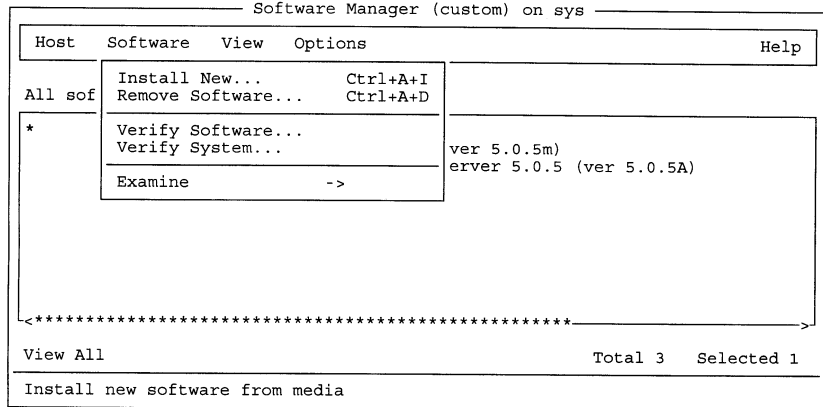

Use the following procedure to install the SCO 5.05 drivers:

1. Verify that you are logged in as root. Type *custom* to start the UNIX custom program, as shown in Figure 1.

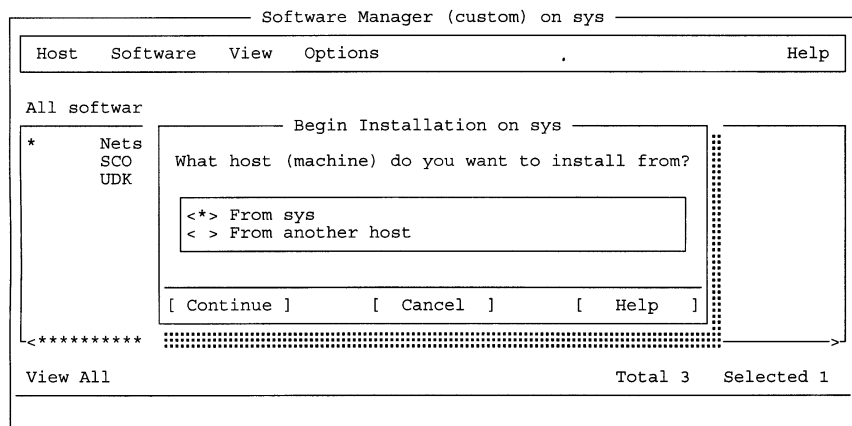

**Figure 1. Software Manager Custom Menu**

2. Select the *Software / Install New* option from the Main Menu using the right arrow key, then press *Enter*, as shown in Figure 2.

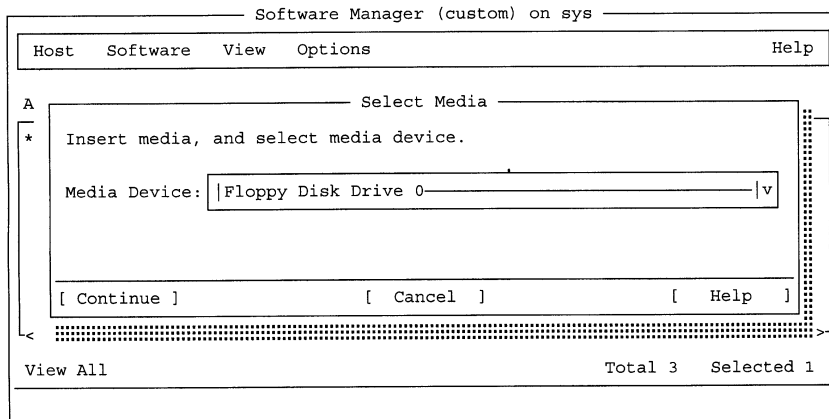

**Figure 2. Selecting the Software Install Option**

3. Select *From sys [host name]*, press *Tab* to select Continue, and press *Enter*.

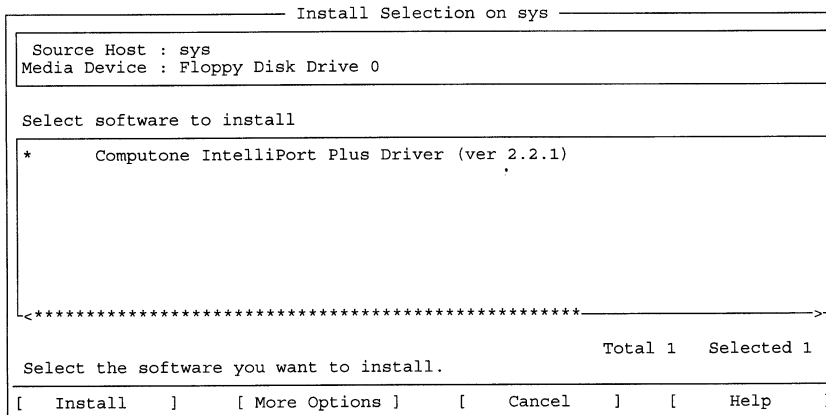

**Figure 3. Selecting Load Source**

- Use the *down arrow key* to select **Floppy Disk Drive 0**, press *Tab* to move the cursor to **Continue** and press *Enter*.

**Figure 4. Selecting the Load Drive**

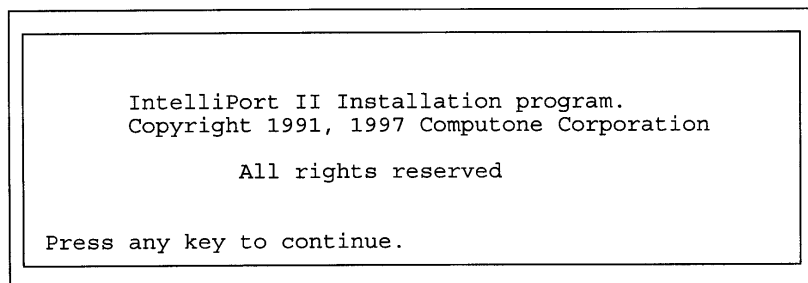

- Select from the list of drivers. In this instance, only the **Computone IntelliPort Plus Driver (ver. 2.2.1)** is displayed. Press *Tab* to select **Install** and press *Enter*.

**Figure 5. Driver Selection**

---

At this point the software begins loading and the IntelliPort II Installation Program banner block is displayed, as shown below. Press any key to continue.

**Figure 6. Installation Program Banner**

  Form
  All boards REQUIRE a unique I/O address range.
  Use the arrow keys to move about the form.

  Press F3 to save the form and to continue.

  Board      Board Type      I/O addr or Slot #  Max Screens/Terminal
  Board 1           Range 1                2

```

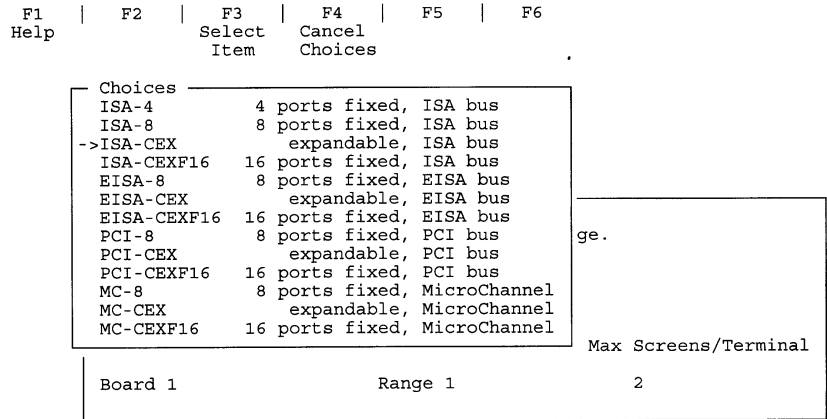

**Figure 10. Setting Board Type**

**NOTE:** You can get the **Board Type** from the carton the board came in. For example, ISA CEX would be a valid **Board Type**.

- For ISA and Micro Channel controllers, specify the base I/O address that this controller is to use. You must assign a unique base I/O address to each IntelliPort II controller.
- For EISA controllers, specify the slot number that this controller is to use. You must assign a unique slot to each Intelliport II controller.
- For PCI controllers, leave I/O address at default.

9. Move the arrow to your selection and press *Enter*.

**Figure 11. Board Type Choices (after F2 is pressed)**

- 
10. Move the cursor using the right arrow key to *I/O addr or Slot #* and press *F2*.  
Move the arrow to the address range you are going to use and press *Enter*.

**NOTE:** If you installing more than one board, each board must have its own unique I/O address range.
